GLOBAL MENTORSHIP INITIATIVE

Session 3
Expand Your LinkedIn Business Network with GMI Connections

Your mentor has been trained to follow the GMI program track designed to help you connect with job recruiters, find the right job, and succeed in the interview process. We also want your mentor to share personal career experiences with you.

Start Making LinkedIn Connections Now

As a GMI student, you have access to thousands of business connections on LinkedIn. We encourage you to make as many connections as you can before beginning your job search. These connections will help you get job interviews. Recruiters are more likely to follow-up with you if you already have LinkedIn connections at their company.

Refer to the LinkedIn Advanced Training Guide to learn how to filter LinkedIn contacts to find the right ones for you to connect with.

To increase your connections, add your college classmates and any business connections you already know. These connections can be made without including a note.
